

# California Faucets Innovative StyleTherm<sup>®</sup> valve Enables Spa-like Experience while Meeting Stringent Water Conservation Codes

Accommodating three devices  
and capable of running two  
simultaneously, the new valve  
allows for a wide array of luxury  
shower combinations

**(Huntington Beach, CA, November 9, 2017)**

California Faucets, manufacturer of artisan-crafted bath and kitchen fixtures, introduces the **StyleTherm<sup>®</sup> TH52D2**, a two-outlet valve that allows for installation of multiple showering devices while still meeting stringent conservation requirements. With the new valve, homeowners can create a myriad of shower configurations, such as a showerhead, handshower, and tub spout or two showerheads combined with a handshower, for the ultimate in showering freedom. The innovative new valve enables users to create a custom spa-like experience while saving water at the same time.

And because StyleTherm comes in a wide range of faceplates, from modern to traditional, users have the flexibility to create a look that speaks to their style preference along with their own personal showering experience. This is because the faceplates, available in Traditional Round, Contemporary Round, and Transitional Square designs, invite most any combination of looks. And with no visible screws they also ensure a clean, elegant result.

StyleTherm<sup>®</sup>  
TH52D2 allows  
multiple  
configurations  
for showering  
freedom

“Just like taste in food or fashion, the ideal showering experience varies from person to person,” says Noah Taft, Senior Vice President of Marketing and Sales for California Faucets. “With StyleTherm, homeowners have everything they need to configure a shower that looks as good on the outside as it works on the inside.”

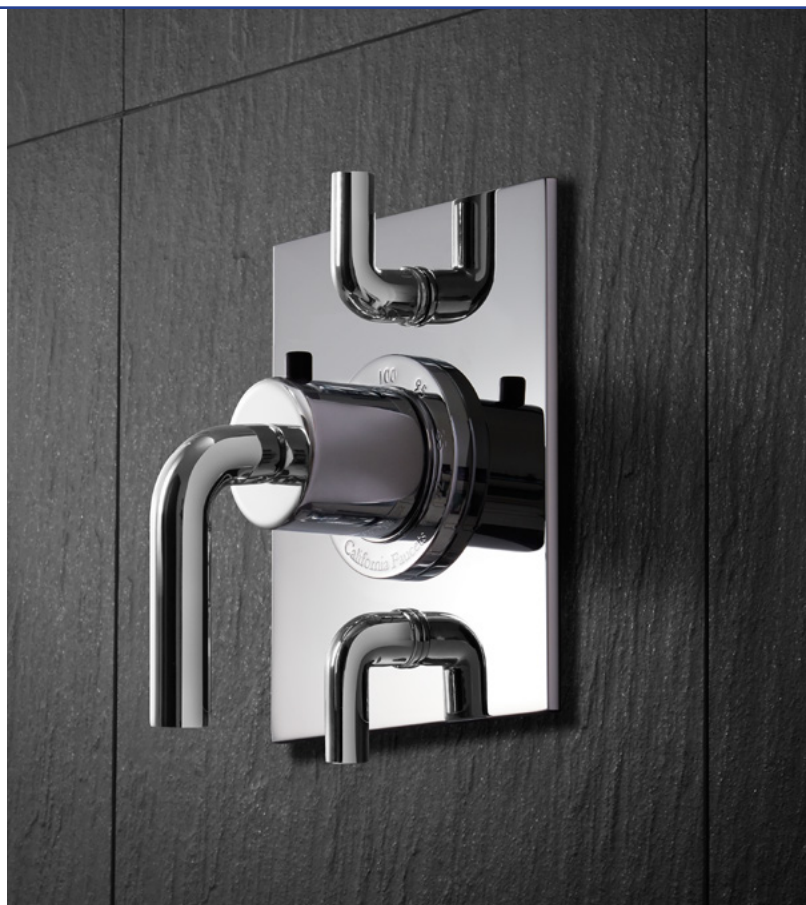

The ½-inch thermostatic rough valve is made with forged brass and includes integral stops and check valves. Its quarter-turn ceramic disc volume-control cartridge is made with a thermoplastic polymer to prevent lime-scale buildup. Each non-shared outlet delivers 7.2 gpm at 60 psi. The single-volume control offers 10.5 gpm at 60 psi.

StyleTherm TH52D2 has an MSRP of \$495.

### About California Faucets

At California Faucets we believe in artisan hands, not mass production. Since 1988, our factory in Huntington Beach, California has manufactured bath products available in a selection of more than 30 artisan **finishes** that can be easily customized or purchased exactly as shown in our catalog. We proudly provide the latest in bath and shower technology with innovations, such as **StyleDrain®**, **StyleTherm®**, and **ZeroDrain®**. These groundbreaking innovations turn utilitarian products into beautiful design statements, and are the heart of our ever-evolving line of faucets, shower fittings, luxury drains, and accessories. Leveraging the expertise we’ve perfected in the bath, we’ve applied the same concepts of handcrafted quality and customization to our first-ever line of kitchen faucets. Launched Fall 2015, **The Kitchen Collection** combines Italian design with California craftsmanship and offers a full range of matching accessories for a thoroughly coordinated look.
