California Faucets Raises the Bar on Shower Safety and Convenience

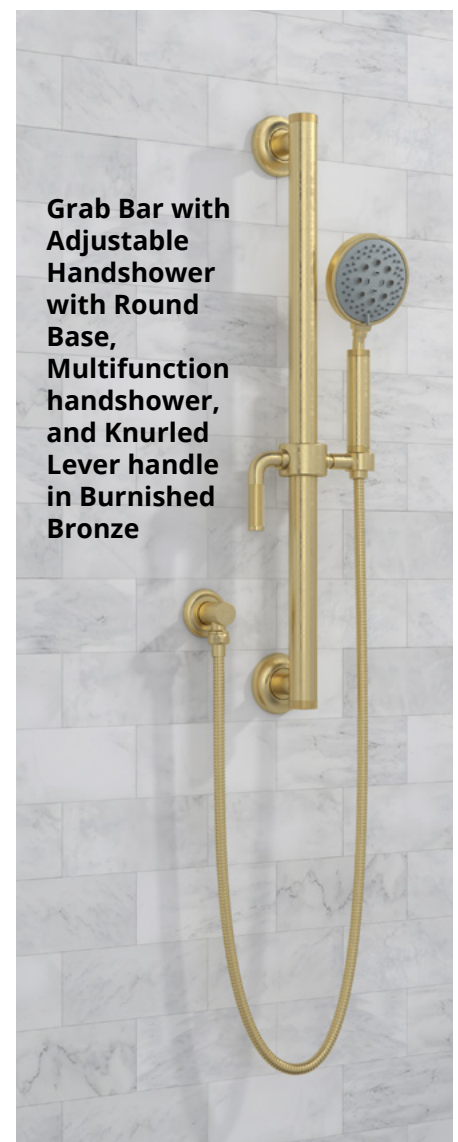

The innovative Grab Bar with Adjustable Handshower marries a sturdy grab bar with an adjustable handshower slide bar, creating a uniquely practical shower solution

(Huntington Beach, CA January 23, 2025) California Faucets proudly unveils its latest innovation: the **Grab Bar** with Adjustable Handshower. This two-in-one product combines the reliability of an ergonomic grab bar with the ease of an adjustable handshower slide bar. By merging these into one stylish element, the company eliminates the need to install both products. This not only streamlines the look of the shower but also reduces the time and expense of installation.

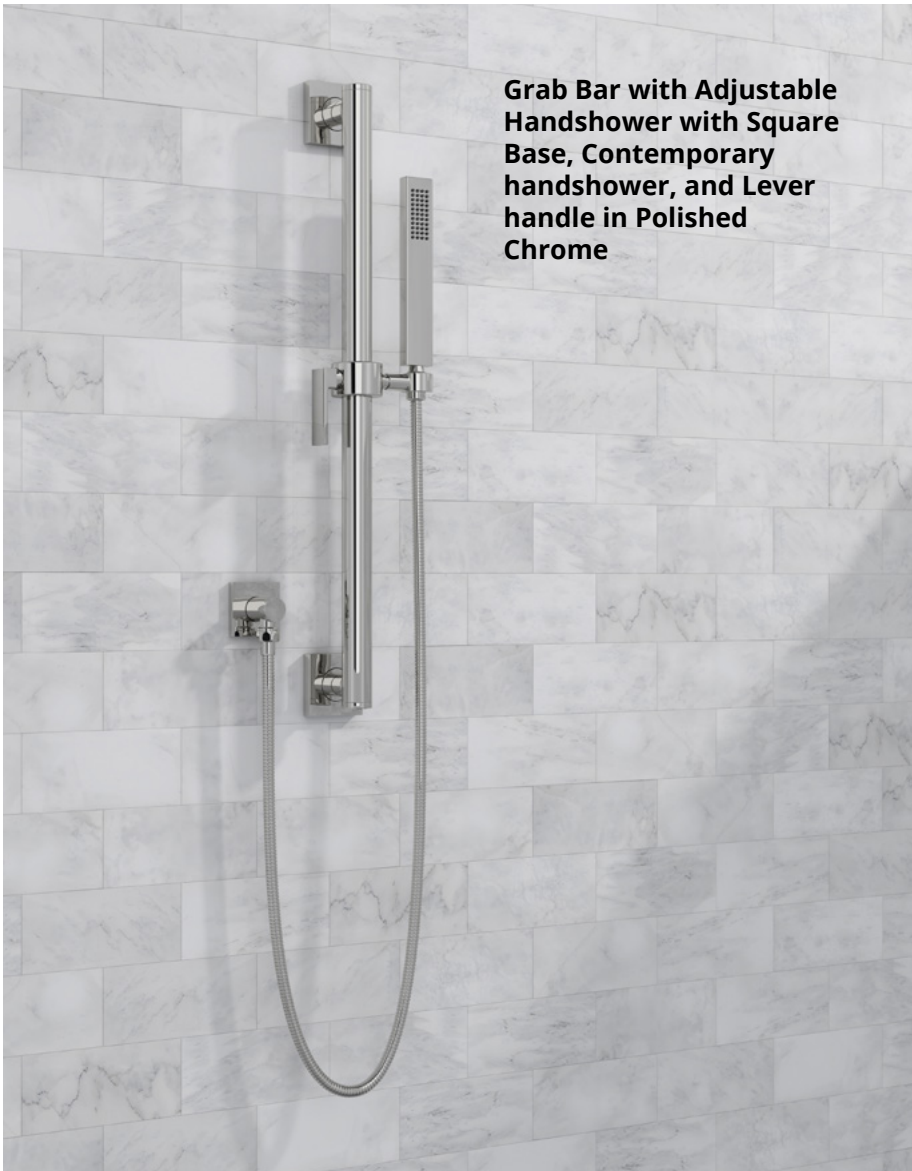

"It's what you get when a grab bar marries a slide bar. They're a match made in decorative plumbing heaven," quips California Faucets Chief Marketing Officer Noah Taft, who explains that the Grab Bar with Adjustable Handshower is Ideal for anyone looking to prioritize safety and convenience while adding a sense of luxury to the bath. "Combining the two means never compromising safety for style," Taft adds.

The innovative new product addresses safety and convenience while blending seamlessly into any style of décor. Options run the style gamut from traditional and transitional to contemporary and industrial. Homeowners can select the handshower and handle design that speaks to their unique style and complete the look with any one of California Faucets' 25-plus artisan finishes. Each bar is made-to-order and finished by hand at the company's Huntington Beach, California factory.

As attractive as it is sturdy, California Faucets Grab Bar with Adjustable Handshower is an essential addition to any shower. Though grab bars are a must for aging-in-place, they're also a great way to add stability and support in the shower, helping to prevent slip-and-fall accidents for all ages. Additionally, the new product is ideal for those who require showering while seated since it allows the handshower to be lowered for easy access. No matter what height is preferred, bathers can simply loosen the handshower, raise or lower it to the desired spot, and tighten it back up again for a perfectly positioned shower stream.
