California Faucets Presents the Capitola™ Series Infused with Italian Design and Natural Gemstones

The new artfully crafted bath collection blending refined Italian design, exceptional craftsmanship, and rare gemstones transforms daily rituals into something extraordinary

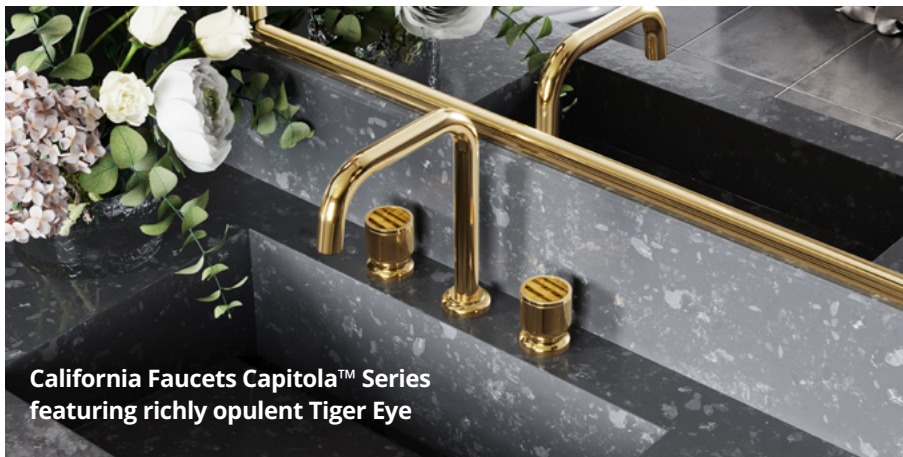

California Faucets' Capitola™ Series blends Italian design with luminous natural gemstones, including Blue Sodalite

(Huntington Beach, CA, May 6, 2026) **California Faucets** unveils an unprecedented new bath faucet collection infused with the artistry of nature. **The Capitola™ Series** seamlessly blends Italian design with luminous natural gemstones, transforming the everyday bath faucet into an expression of luxury. Named for the colorful, Mediterranean-style seaside town of Capitola in Santa Cruz County, California, the customizable collection offers two distinct spout designs and two sculptural handle styles, which can be paired with authentic semi-precious stones. From the calm, serene beauty of Blue Sodalite to the bold,

untamed allure of Tiger Eye, the radiant gemstones evoke a sense of relaxed sophistication and expressive individuality.

"Capitola represents the pinnacle of design expression for California Faucets, and the most luxurious offering in the company's history, where hand-selected natural gemstones take center stage," says Jeff Silverstein, Head of Product & Brand at California Faucets. "Each stone's distinctive color, depth, and character transforms the faucet into a work of art, elevating the bath into a deeply personal, luxurious experience."

California Faucets Capitola™ Series
featuring richly opulent Tiger Eye

The defining element of the Capitola collection is its curated selection of handle inserts, featuring sophisticated Black Glass, effortlessly refined White Marble, dramatic Black Marble, tranquil Blue Sodalite, calming Green Aventurine, warm Red Jasper, and richly opulent Tiger Eye. Adding authenticity and heritage to every detail, the stones are crafted by a small family workshop in Idar-Oberstein, Germany—a historic center of stone cutting and lapidary artistry dating back to the 1400s—where a fifth-generation brother and sister team of stone cutters carefully reveal the unique character of every piece.

The Capitola series offers two spout options: a stately Quad Spout and a graceful High Spout. It pairs beautifully with a Metal Lever or Metal Cylinder handle, or an optional Wall Lever configuration for wall-mounted applications. The cylinder handle features refined pinstripe detailing for added texture and dimension, while the lever handle remains smooth and understated.

True to California Faucets' commitment to quality, the Capitola Series is constructed from solid brass and offered in more than 25 artisan-applied finishes, including durable PVD finishes engineered to resist tarnishing. Extensive customization options—including split finishes—allow for near-limitless design flexibility.

The collection extends beyond the bath faucet to include a full suite of coordinating bath elements, from shower trim and Roman Tub sets to handshowers, hooks, towel bars, and paper holders—allowing homeowners, designers, and architects to create a cohesive, tailored environment.

With the Capitola Series, California Faucets offers designers and homeowners alike the creative freedom to infuse character, elegance, and artistry into the bath. The unique blend of Italian-inspired design, sculptural silhouettes, precision metalworking, and expressive natural stone elevates the faucet beyond utility and into the defining feature of the bath.

Pricing for the Capitola Series bath faucet with Metal Cylinder Handles and Quad Spout starts at \$2,279.

About California Faucets

California Faucets transforms daily life through exceptional kitchen and bath products that embody authenticity, craftsmanship, and beauty. Established in 1988 in Huntington Beach, the company handcrafts each solid-brass piece with meticulous attention to detail, offering extensive customization. With more than 25 artisan-applied finishes, every faucet and fitting can be tailored to reflect an individual's distinct taste and style. From award-winning bath collections that extend beyond faucets to include spa-like rain showers and elegant tub fillers, to Italian-inspired kitchen faucet collections, California Faucets products elevate everyday moments into refined experiences. Driven by a spirit of innovation, the company pushes industry boundaries to redefine what's possible in kitchen and bath design. Notable advancements include **ZeroDrain®**, the industry's first "pop-down" drain; **StyleDrain®**, the first truly decorative drain to enter the market; high-performance tub fillers engineered to fill in half the time; and **StyleTherm®**, thermostatic showers that deliver precise temperature and volume control. Through thoughtful design, superior materials, and an unwavering commitment to innovation, California Faucets ensures every product exceeds expectations—enriching the home as a sanctuary for daily rituals.
